Abstract. This study aims to design and develop an application that can analyze-governmentpolicies systematically online. February 2021 Microsoft make survey which states that Indonesia is an uncivilized country in position 29 of 32 countries in Southeast Asia in social media, including in criticizing government policies. Since the end of 2019 there has been a pandemic Covid-19, which causes limitations on community mobility in providing aspirations and analyzing government policies. The legal basis that we use is Law Number 30 of 2014 concerning Government Administration, Article 1 paragraph 2 of the 1945 Constitution. The research we carried out was through a field observation process, namely conducting research on the urgency of the formation of applications, then designing applications and developing applications. Government policy analysis. The subjects of our research are students in the Special Region of Yogyakarta who have PPKn study programs, researchers who collect data through the literacy study process and questionnaires or questionnaires that we give to research subjects. We found the fact that analyzing a policy is still done manually. The result of this research is to make an analysis application of a government policy. This application can be useful for the community and government agencies in making government policies.

Keywords: Analysis · Application · Government · People

1 Introduction

Government policy is a decision made by the government, be it central government and local government, which aims to solve public problems (Suharno, 2016: 05). According to Thomas R. Dye (1975) in Mustari (2015:04) states that whatever the government chooses to do or not do is called public policy. According to Carl J. Federick in Taufiqrokhman (2014: 02). States that a series of actions or activities proposed by a person,

group, or government in a certain environment where there are obstacles (difficulties) and opportunities for the implementation of the proposed policy in order to achieve certain goals. According to E. Anderson (1990) and Thomas R. Dye (1992) in Agustino (2020:02–04) stated that, there are several important reasons for studying public policy, namely:

- a. The first reason is to add insight or knowledge about adding deeper knowledge about the policy process (scientific reasons).
- b. The second reason is to serve as a medium of professional judgment (professional reasons)
- c. The third reason is to serve as a political medium (political reasons).

The process of analyzing public policies during a pandemic Covid-19, undergoes a change, which is usually offline, is currently being implemented on line. According to Williams (1971) in Simatupang (2003:02) states that, a step to integrate two or more information, whether based on the aspirations of the community, or from research results, which aims to recommend alternative designs of public policies, is referred to as policy analysis. Public. This research is very urgent to assist the community in providing aspirations for government policies, and is useful for the government as a process of analyzing a policy. Government Policy Analysis Application (A2KP).

2 Research Method

This type of research is research and development or Research and Development (R&D). Research and development methods or Research and Development (R&D) is a research method used to produce certain products, and test the effectiveness of these products (Sugiyono, 2010: 407). This research can produce certain products and the development of existing products is then carried out a needs analysis to test the effectiveness of these products. In general, research R&D character longitudinal (several stages) (Sugiyono, 2010: 11).

3 Results and Discussion

The research that we conducted on May 28, 2021 until September 20, 2021, with research subjects or sources, namely Universities in the Special Region of Yogyakarta with PPKn study programs, using data collection techniques in the form of observation, questionnaires or questionnaires and literature study literacy. The number of our research subjects is 250 people. We used purposive sampling technique in determining research subjects, and techniques in data collection we used observation techniques, questionnaires or documentation, and literature study literacy. The data was analyzed qualitatively by using a descriptive approach and for quantitative analysis of the test results using analytical techniques Sign Test. And the research method we use is Research and Development (R&D) namely conducting research on the urgency of making a government policy analysis application and then developing a government policy analysis application design.

Our research subjects are presented in Table 2. As questionnaire respondents, namely (Table 1).

The results of our pre-study are presented in Table 2 as follows.

The results of our post-research are presented in Table 3 as follows.

Table 1. RESEARCH SUBJECTS

No	Research Subject	Amount
1	Yogyakarta State University Students	50
2	Yogyakarta Cokroaminoto University Students	100
3	Ahmad Dahlan University Students	100

Table 2. Pre-Research Results

No	Assessment Aspect	Information	Percentage
1	The need for making A2KP to analyze and criticize government policy	– 10 respondents stated that it was not necessary – 240 respondents stating that it needs to be made	– 4% said it didn’t need to be made - 96% stated need to be made
2	Indonesia Netizens have or do not have character in criticizing government policies	– 50 respondents said they had – 200 respondents say not yet	– 20% state already – 80% state not yet

Table 3. Post-Research Results

A. Quality Aspects of Content and Purpose					
No	Assessment Aspect	1	2	3	4
1	The suitability of the material presented in the learning media with the Government Policy Analysis Application (A2KP).	0.5%	0,5%	78%	21%
2	The suitability of the material in the learning media with the needs of lectures related to efforts to assess and criticize the policies of the Central Government and Regional Governments.	0%	1%	69%	30%
3	The suitability of the material presented in the learning media for the mastery of student competencies.	0%	0%	75%	25%
4	The suitability of the material presented in the learning media to support learning	0%	2.3%	73%	24.7%

(continued)

Table 3. (continued)

A. Quality Aspects of Content and Purpose					
No	Assessment Aspect	1	2	3	4
5	The ability of learning media makes students enthusiastic in participating in the learning process.	1.5%	0.5%	70.3%	27.7%
6	The ability of learning media to be able to provide meaningful experiences in the learning process.	0%	2.4%	74.7%	22.9%
7	The ability of learning media to be used independently or in groups.	0%	1.5%	81.2%	17.3%
8	The ability of learning media to be operated	0%	1.4%	74.9%	23.7%
9	The ability of learning media to provide appropriate feedback from the results of the	3.5%	0.5%	73.2%	22.8%
10	The suitability of the questions/evaluations on the learning media with the material that	0.5%	1.5%	78.8%	19.1%
11	Ability questions/evaluations on learning media to measure students' understanding of the material.	0.5%	0.5%	75.5%	23.5%
12	Ability to use learning media for assist students in participating in the learning process or literacy activities.	1.5%	2.7%	81%	14.8%
13	The ability to use learning media to facilitate students in achieving a complete and applicable understanding.	0%	1.5%	68.7%	29.8%
14	Ability to use learning media to make it easier educators in conducting the learning process of Public Policy at the University.	0%	1.5%	69.3%	29.2%
15	Ability to use learning media to make it easier educators in determining the level of success of learning or literacy activities.	0%	2.5%	78.4%	19.1%

Based on the results of the research that we have done, it is important to make the Government Policy Analysis Application (A2KP) as a medium of appreciation from the people to criticize the policies of the central government and local governments. The following is the A2KP display and the procedure for using A2KP.

4 Conclusion

Based on the discussion that we have described in the previous chapter, there are several conclusions. In making the Government Policy Analysis Application, there is a design that we have designed, and prior to designing the research activities it is important to make a Government Policy Analysis Application (A2KP) as a medium of appreciation from the people to assess and criticize the policies of the central government and local governments. In the context of developing the Government Policy Analysis Application, there is cooperation from various elements, such as research subjects who provide suggestions and input to us, supervisors who provide suggestions and corrections, as well

as all friends and family who continue to support our research. Don't forget the related department.
