All of the articles in this proceedings volume have been presented at the *AsiaCALL2022* during 26–27 November 2022 in *Ha Noi University of Industry, Ha Noi, Vietnam*. These articles have been peer reviewed by the members of the *Scientific Committee of Asia-CALL2022* and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

## 1 Review Procedure

The reviews were *double-blind*. Each submission was examined by *at least 2* reviewer(s) independently.

*The conference submission management system was EasyChair and emails of the conference.*

The submissions were first screened for generic quality and suitability. After the initial screening, they were sent for peer review by matching each paper's topic with the reviewers' expertise, taking into account any competing interests. A paper could only be considered for acceptance if it had received favourable recommendations from the two reviewers.

Authors of a rejected submission were given the opportunity to revise and resubmit after addressing the reviewers' comments. The acceptance or rejection of a revised manuscript was final.

## 2 Quality Criteria

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions:

1. Pertinence of the article's content to the scope and themes of the conference;
2. Clear demonstration of originality, novelty, and timeliness of the research;
3. Soundness of the methods, analyses, and results;
4. Adherence to the ethical standards and codes of conduct relevant to the research field;

---

V. P. H. Pham—Editors-in-Chief of the AsiaCALL2022.

5. Clarity, cohesion, and accuracy in language and other modes of expression, including figures and tables.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher. *Similarity index of each paper should be less than 20%.*

### 3 Key Metrics

Total submissions	96
Number of articles sent for peer review	57
Number of accepted articles	26
Acceptance rate	27%
Number of reviewers	26
