All of the articles in this proceedings volume have been presented at the ICoSIA 2022 during November 22–23, 2022 in Yogyakarta, Indonesia. These articles have been peer reviewed by the members of the Scientific Committee and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

1 Review Procedure

The reviews were single-blind. Each submission was examined by 2 reviewers independently.

The conference submission management system was EDAS Conference and Journal Management System.

All submitted manuscripts are read by the editorial staff. Those manuscripts evaluated by editors to be inappropriate to conference criteria are rejected promptly without external review. The submissions were sent for peer review by matching each paper's topics with the reviewers' expertise while avoiding conflict of interest between the authors and the reviewers. The reviewers reviewed the papers based on the suitability to the topics of the conference and quality. The accepted papers are those that received favourable recommendations from at least two reviewers. The acceptance or rejection of manuscripts was final. Authors can check the status of their manuscript anytime from their account in the system. The committee will notify authors via email when the review process is finished. After the authors get the notification of acceptance, authors need to finalize their final manuscript in accordance with the author guidelines and review results.

2 Quality Criteria

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions:

1. The importance and timeliness of the topic addressed in the paper within its area of research;

J. T. S. Sumantyo—Editor-in-Chief of the ICoSIA 2022.

2. The technical content of the paper (e.g.: completeness of the analysis or simulation study, thoroughness of the treatise, accuracy of the models, etc.), its soundness and scientific rigour;
3. The novelty and originality of the ideas or results presented in the paper.
4. The paper organization, the clearness of text and figures, the completeness and accuracy of references;
5. The quality of English in the manuscripts; and
6. The subject matter and style of presentation appropriate with the publisher.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher.

3 Key Metrics

Total submissions	102
Number of articles sent for peer review	81
Number of accepted articles	64
Acceptance rate	62.74%
Number of reviewers	38

Competing Interests. Neither the Editor-in-Chief nor any member of the Scientific Committee declares any competing interest.

The scientific committee pledged to assign papers whose authors' affiliations are not related to the assigned reviewers to avoid any bias and conflict of interest.
