All of the articles in this proceedings volume have been presented at the *The ICHWB 2022* during 5–6 December 2022 virtually, in *Indonesia*. These articles have been peer reviewed by the members of the *Reviewers Committee* and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference’s review process.

1 Review Procedure

The reviews were *Single Blind*. Each submission was examined by *two* reviewers independently.

The conference submission management system was <https://ichwb.ums.ac.id/2022/>.

The submissions were first screened for generic quality and suitability. After the initial screening, they were sent for peer review by matching each paper’s topic with the reviewers’ expertise, taking into account any competing interests. A paper could only be considered for acceptance if it had received favourable recommendations from the two reviewers.

Authors of a rejected submission were given the opportunity to revise and resubmit after addressing the reviewers’ comments. The acceptance or rejection of a revised manuscript was final.

The review process was carried out twice. Starting with reviewers reviewing authors’ articles, then the authors improve their articles according to the reviewer’s advice. Next, reviewers give suggestions related to whether the improvements are in accordance with the quality of a good research article.

2 Quality Criteria

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions.

1. Pertinence of the article’s content to the scope and themes of the conference;
2. Clear demonstration of originality, novelty, and timeliness of the research;
3. Soundness of the methods, analyses, and results;
4. Adherence to the ethical standards and codes of conduct relevant to the research field;

B. Ichsani—Editors-in-Chief of the ICHWB 2022.

5. Clarity, cohesion, and accuracy in language and other modes of expression, including figures and tables.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher.

3 Key Metrics

Total submissions	115
Number of articles sent for peer review	62
Number of accepted articles	46
Acceptance rate	74.1%
Number of reviewers	15

Competing Interests. Neither the Editor-in-Chief nor any member of the Scientific Committee declares any competing interest.
