All of the articles in this proceedings volume have been presented at the International Conference on Psychology on Indigenous Treatment and Contemporary Psychology (ICoP) during November 26, 2022 in Zoom Platform. These articles have been peer reviewed by the members of the Committee ICoP and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

1 Review Procedure

The reviews were double-blind. Each submission was examined by 2 reviewers independently. The conference submission management system was papericop.mercubuana-yogya.ac.id.

The submissions were first screened for generic quality and suitability. After the initial screening, they were sent for peer review by matching each paper's topic with the reviewers' expertise, taking into account any competing interests. A paper could only be considered for acceptance if it had received favourable recommendations from the two reviewers.

Authors of a rejected submission were given the opportunity to revise and resubmit after addressing the reviewers' comments. The acceptance or rejection of a revised manuscript was final.

2 Quality Criteria

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions:

1. Pertinence of the article's content to the scope and themes of the conference;
2. Manuscripts must be free from plagiarism. Similarity limit less than 20%
3. Clear demonstration of originality, novelty, and timeliness of the research;

F. Hutagalung—*Editor-in-Chief of the [ICoP]*.

https://doi.org/10.2991/978-2-38476-080-0_1

4. Soundness of the methods, analyses, and results;
5. Adherence to the ethical standards and codes of conduct relevant to the research field;
6. Clarity, cohesion, and accuracy in language and other modes of expression, including figures and tables.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher. Each manuscript will be checked by the plagiarism committee using the Turnitin application. If the similarity exceeds 20%, the author must modify the manuscript.

3 Key Metrics

Total submissions	33
Number of articles sent for peer review	13
Number of accepted articles	13
Acceptance rate	39,3%
Number of reviewers	21

Competing Interests. Neither the Editor-in-Chief nor any member of the Scientific Committee declares any competing interest.
