All of the articles in this proceedings volume have been presented at the *Law International Conference and Studies during in September 2022* in Semarang Faculty of Law, Islamic University of Sultan Agung. These articles have been peer reviewed by the members of the scientific committee and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

1 Review Procedure

The reviews were single-blind. Each submission was examined by two reviewers independently.

The submissions were first screened for generic quality and suitability. After the initial screening, they were sent for peer review by matching each paper's topic with the reviewers' expertise, taking into account any competing interests. A paper could only be considered for acceptance if it had received favourable recommendations from the two reviewers.

Authors of a rejected submission were given the opportunity to revise and resubmit after addressing the reviewers' comments. The acceptance or rejection of a revised manuscript was final.

As the review process was done by using single-blind, means the reviewers did not know whose article she/he working with. We tried the best to avoid sending articles to reviewer who has closely related to the author. This step is put into account to reduce unconscious bias.

2 Quality Criteria

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions:

1. Pertinence of the article's content to the scope and themes of the conference;
2. Clear demonstration of originality, novelty, and timeliness of the research;
3. Soundness of the methods, analyses, and results;
4. Adherence to the ethical standards and codes of conduct relevant to the research field;

F. K. Giray—Editor in Chief-Sri Endah Wahyuningsih [LICS].

5. Clarity, cohesion, and accuracy in language and other modes of expression, including figures and tables.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher.

3 Key Metrics

Total submissions	122
Number of articles sent for peer review	90
Number of accepted articles	41
Acceptance rate	33.6%
Number of reviewers	15

Competing Interests. The conference was partially funded by Acme, Inc., a company that has also supported or participated in some of the research submitted to the conference. All authors and reviewers are required to disclose their funding sources, and those research works that were funded by Acme have been reviewed by members of the Scientific Committee with no personal interests in the company.
