All of the articles in this proceedings volume have been presented at the First biennial International Conference on Advances in Computer Vision and Artificial Intelligence Technologies (ACVAIT 2022) during 1–2 Aug 2022 in Aurangabad (Maharashtra), India. These articles have been peer reviewed by the members of the Technical Program Committee (TPC) and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference’s review process.

1 Review Procedure

The reviews were double blind. Each submission was examined by two reviewer(s) independently. The conference collection of were developed using *EasyChair* where the authors have made their submissions. The conference chair and has assigned manuscript to the member of technical program committee to review manuscript.

The process adopted by the conference team includes following activities. At the first the submitted manuscript was carefully screened for generic quality, suitability and plagiarism report of each and every submission was obtained from Turnitin software. The copy of the plagiarism report was made available to authors on to the conference accounts of the author. After the initial screening, they were sent for peer review by matching each paper’s topic with the reviewers’ expertise, taking into account any competing interests. A paper could only be considered for acceptance if it had received favourable recommendations from the two reviewers. Moreover, the authors are encouraged to revise their manuscript in line with the suggestions/comments of reviewer. All accepted and revised manuscripts are considered for the part of conference collection. The double blinded peer review is adopted therefore initially, the manuscript is allocated to two reviewers, based on the collective decision of reviewer the selection of manuscript was taken as:

Review 1	Review 2	Review 3	Decision
Positive	Positive	-	Positive
Negative	Negative	-	Negative
