All of the articles in this proceedings volume have been presented at the 7th International Conference on Food, Agriculture, and Natural Resources (IC-FANRES 2022) during November 24-25, 2022, in Hotel Merumatta, Senggigi, Lombok, Indonesia. These articles have been peer reviewed by the members of the Scientific Committee and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

1 REVIEW PROCEDURE

The reviews were double-blind. Each submission was examined by 2 reviewer(s) independently. Any manuscript received for review must be treated as a confidential document. They may not be shown or discussed with others except as permitted by the editor.

The conference submission management system was Open Journal Systems/Public Knowledge Project (OJS/PKP).

The submissions were first screened for generic quality and suitability. After the initial screening, they were sent for peer review by matching each paper's topic with the reviewers' expertise, taking into account any competing interests. A paper could only be considered for acceptance if it had received favourable recommendations from the two reviewers.

Authors of a rejected submission were given the opportunity to revise and resubmit after addressing the reviewers' comments. The acceptance or rejection of a revised manuscript was final.

Reviewers are recused from the handling of papers by closely related authors, steps taken to reduce unconscious bias.

2 QUALITY CRITERIA

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions:

1. Pertinence of the article's content to the scope and themes of the conference;

Q. D. Utama et al. (eds.), *Proceedings of the 7th International Conference on Food, Agriculture, and Natural Resources (IC-FANRES 2022)*, Advances in Biological Sciences Research 35,

https://doi.org/10.2991/978-94-6463-274-3_1

2. Clear demonstration of originality, novelty, and timeliness of the research;
3. Soundness of the methods, analyses, and results;
4. Adherence to the ethical standards and codes of conduct relevant to the research field;
5. Clarity, cohesion, and accuracy in language and other modes of expression, including figures and tables.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher.

3 KEY METRICS

Total submissions	95
Number of articles sent for peer review	51
Number of accepted articles	36
Acceptance rate	37,9%
Number of reviewers	10

4 COMPETING INTERESTS

Neither the Editor-in-Chief nor any member of the Scientific Committee declares any competing interest.
