All of the articles in this proceedings volume have been presented at the [4<sup>th</sup> Green Development International Conference] during [October, 1–2 2022] in [Swiss-Belhotel Jambi]. These articles have been peer reviewed by the members of the [Scientific Committee of 4th Green Development International Conference] and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

## 1 Review Procedure

The reviews were [double-blind]. Each submission was examined by [2] reviewer(s) independently.

*The conference submission management system was [Website-based for submission and will enter Google Drive from the committee, as well as the review process is carried out in a double-blind manner by sending the received paper to the reviewer using email.]*

*[Submissions are first screened for quality and general suitability. After initial screening, they were sent for peer review by two reviewers by matching each paper's topic to the reviewer's expertise, taking into account competing interests. After that, we send the results from the reviewers to the authors to be corrected, after that, the authors send them back to the editors, and the editors send them back to the reviewers for further review. The papers we receive are papers that have received recommendations from the two reviewers that we previously provided.]*

Authors of a rejected submission were given the opportunity to revise and resubmit after addressing the reviewers' comments. The acceptance or rejection of a revised manuscript was final.

## 2 Quality Criteria

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions: 1) Pertinence of the article's content to the scope and themes of the conference; 2) Clear demonstration of originality, novelty, and timeliness of the research; 3) Soundness of the methods, analyses, and results; 4) Adherence to the ethical standards and codes of conduct relevant to the research field; 5) Clarity, cohesion, and accuracy in language and other modes of expression, including figures and tables.
