All of the articles in this proceedings volume have been presented at the 2023 International Conference on Image, Algorithms and Artificial Intelligence (ICIAAI 2023) during August 11 to August 13 in Singapore. These articles have been peer reviewed by the members of the Technical Committee and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

## 1 REVIEW PROCEDURE

The reviews were double-blind. Each submission was examined by at least 2 reviewers independently.

The submissions were first screened for generic quality and suitability. After the initial screening, they were sent for peer review by matching each paper's topic with the reviewers' expertise, taking into account any research interests. A paper could only be considered for acceptance if it had received favourable recommendations from the two reviewers.

Authors of a rejected submission were given the opportunity to revise and resubmit after addressing the reviewers' comments. The acceptance or rejection of a revised manuscript was final.

An overall evaluation or detailed reviewing result (if any) will be given. In the end of the review, the final decision of Accept/Revision/Reject will be selected. When it is marked by Revision, we will have a double check of the revised papers before acceptance.

## 2 QUALITY CRITERIA

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions

1. Pertinence of the article's content to the scope and themes of the conference;
2. Clear demonstration of originality, novelty, and timeliness of the research;
3. Soundness of the methods, analyses, and results;
4. Adherence to the ethical standards and codes of conduct relevant to the research field;

---

P. Kar—Editors-in-Chief of the ICIAAI 2023.

5. Clarity, cohesion, and accuracy in language and other modes of expression, including figures and tables;
6. Inclusion of Author information, Abstract, Keywords, Introduction, Methods and Materials, Conclusions, References, Acknowledgments (If applicable).

In addition, all of the articles have been double checked by authors themselves and technical committee for textual overlap in an effort to detect possible signs of plagiarism by the publisher.

### **3 KEY METRICS**

<i>Total submissions</i>	167
<i>Number of articles sent for peer review</i>	152
<i>Number of accepted articles</i>	105
<i>Acceptance rate</i>	62.9%
<i>Number of reviewers</i>	13

### **4 COMPETING INTERESTS**

Neither the Editor-in-Chief nor any member of the Scientific Committee declares any competing interest.
