*Editor-in-Chief of the ICOEINS 2023. Email: mahmuddwis@telkomuniversity.ac.id

All of the articles in this proceedings volume have been presented at the ICOEINS 2023 during 4-5 October 2023 in Bali, Indonesia. These articles have been peer reviewed by the members of the Technical Program Committee (TPC) and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

1. REVIEW PROCEDURE

The reviews were single-blind. Each submission was examined by at least 2 reviewer(s) independently.

The conference submission management system was Easychair.

Submissions were first screened for generic quality and suitability. After the initial screening, they were sent for peer review by matching each paper's topic with the reviewers' expertise, taking into account any competing interests. A paper could only be considered for acceptance if it had received favourable recommendations from the two reviewers.

Each accepted paper should also attach its similarity score using any plagiarism detection tools, such as iThenticate, Turnitin, etc. and the resulting score must not be more than 25%.

To maintain fairness and avoid conflicts of interest in the review process, the ICOEINS 2023's TPC team involves external reviewers.

Authors of a rejected submission were given the opportunity to revise and resubmit after addressing the reviewers' comments. The acceptance or rejection of a revised manuscript was final.

Every accepted paper is required to be presented at the ICOEINS 2023 event. Failure to do so will result in the application of the non-presented paper policy or will be considered as a rejected paper, leading to exclusion from publication.

2. QUALITY CRITERIA

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content. Each paper has undergone a rigorous review process, ensuring scholarly rigor and adherence to the standards, with the following criteria:

- The abstract's conformity to the guideline
- The paper presents completeness and clarity of the research problem and the arguments to justify the research problem.
- The paper presents the correctness of the research method and its effectiveness in solving the problems.
- Related works effectively support the research problem's arguments and results.
- The adequacy in the delivery of results or discussion
- Novelty & the impact, correctness, and the validity of the result
- The adequacy and validity of the references
- The readability of the paper and format according to the template
- A detailed review, including a justification for the scores from the reviewer.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher. Each accepted paper should also attach its similarity score using any plagiarism detection tools, such as iThenticate, Turnitin, etc. and the resulting score must be below 25%.

3. KEY METRICS

Total submissions	73
Number of articles sent for peer review	73
Number of accepted articles	29
Acceptance rate	39.7%
Number of reviewers	31

4. COMPETING INTERESTS

Neither the Editor-in-Chief nor any member of the Scientific Committee declares any competing interest. Editor-in-chief and the conference chair involved in the review and decision-making process of these proceedings may have affiliations with the same organization with some of the authors. The editorial team has taken measures to ensure fair and unbiased evaluation. Rigorous editorial processes have been employed to maintain objectivity.
