All of the articles in this proceedings volume have been presented at the *ATASEC 2023* during *15-16 September 2023* in *Malang, Virtually*. These articles have been peer reviewed by the members of the *Reviewer Committee* and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

1 REVIEW PROCEDURE

The reviews were *single-blind*. Each submission was examined by 2 reviewer(s) independently.

The conference submission management system was Conference Management Toolkit (CMT)

The submissions were first screened for generic quality and suitability by the editor. After the initial screening, they were sent for peer review by matching each paper's topic with the reviewers' expertise, taking into account any competing interests. A paper could only be considered for acceptance if it had received favourable recommendations from the two reviewers.

Authors of a rejected submission were not given the opportunity to revise and resubmit after addressing the reviewers' comments. The acceptance or rejection of a revised manuscript was final.

The reviewer committee consists of 12 people. The paper will be reviewed by reviewers based on their expertise. The reviewers have the option to accept or decline the review assignment given by the editor.

2 QUALITY CRITERIA

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions:

1. Pertinence of the article's content to the scope and themes of the conference;
2. Clear demonstration of originality, novelty, and timeliness of the research; The reviewer will assess the paper on which side the paper has differences from published papers.

R. Andrie Asmara—Editor-in-Chief of the ATASEC 2023.

R. Andrie Asmara et al. (eds.), *Proceedings of the 5th Annual Advanced Technology, Applied Science, and Engineering Conference (ATASEC) 2023*, Advances in Engineering Research 229,

https://doi.org/10.2991/978-94-6463-358-0_1

3. Soundness of the methods, analyses, and results;
4. Adherence to the ethical standards and codes of conduct relevant to the research field;
5. Clarity, cohesion, and accuracy in language and other modes of expression, including figures and tables.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher.

3 KEY METRICS

<i>Total submissions</i>	33
<i>Number of articles sent for peer review</i>	33
<i>Number of accepted articles</i>	25
<i>Acceptance rate</i>	75%
<i>Number of reviewers</i>	12

4 COMPETING INTERESTS

Neither the Editor-in-Chief nor any member of the Scientific Committee declares any competing interest.
