All of the articles in this proceedings volume have been presented at the

The 2nd International Interdisciplinary Conference on Environmental Sciences and Sustainable Developments: Environmental Sciences and Sustainable Developments (ICESSD-ESD) 2022 during 7-8 October 2022 in Best Western Hotel Palu, Indonesia. These articles have been peer reviewed by the members of the reviewers board of ICESSD and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

1. REVIEW PROCEDURE

The reviews were single blind review. Each submission was examined by 2 reviewers independently.

The conference submission management system was easychair.org

The submissions were first screened for generic quality and suitability. After the initial screening, they were sent for peer review by matching each paper's topic with the reviewers' expertise, taking into account any competing interests. A paper could only be considered for acceptance if it had received favourable recommendations from the two reviewers.

Authors of a rejected submission were given the opportunity to revise and resubmit after addressing the reviewers' comments. The acceptance or rejection of a revised manuscript was final.

Peer review assists the editor in making editorial decisions and through the editorial communications with

the author may also assist the author in improving the paper.

2. QUALITY CRITERIA

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions:

1. Authors of reports of original research should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable.;
2. The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted.
3. An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable.
4. Authorship should be limited to those who have made a significant contribution to the conception,

- 2 N. Edy et al.
design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher.

3. KEY METRICS

<i>Total submissions</i>	52
<i>Number of articles sent for peer review</i>	44
<i>Number of accepted articles</i>	42
<i>Acceptance rate</i>	76.36%
<i>Number of reviewers</i>	6

4. COMPETING INTERESTS

All authors should disclose in their manuscript any financial or other substantive conflict of interest that might be construed to influence the results or interpretation of their manuscript. All sources of financial support for the project should be disclosed.
