All of the articles in this proceedings volume have been presented at the 2023 1st International Conference on Advanced Informatics and Intelligent Information Systems (ICAI3S 2023) during November 29 - 30 in Yogyakarta, Indonesia. These articles have been peer reviewed by the members of the Scientific Committee and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

1. REVIEW PROCEDURE

The reviews were single-blind, ensuring the concealment of reviewers' identities and affiliations. Each submission was examined by [at least 2] reviewer(s) independently.

The conference submission management system was the EasyChair System.

All new manuscripts to ICAI3S 2023 should be submitted directly via the EasyChair System. The submitted articles have undergone several steps as follows.

Step 1: The submissions were first screened for generic quality and suitableness.

Step 2: Upon the first evaluation, all submitted papers were distributed for peer review by aligning each paper's topic with the reviewers' experience and analyzing potential competing interests.

Step 3: During the review process, reviewers provided separate suggestions and revisions for the papers.

Step 4: Review Reports received from the experts were then analyzed by one of the editors with international scientific standards to render the decision for the corresponding submissions.

Step 5: There are three types of decisions: accepted with minor corrections, accepted with major corrections, and rejected. A paper could only be considered for acceptance if it had received favourable recommendations from at least two reviewers.

Step 6: The corresponding editor sent the decision to the authors along with the Review Reports from the experts. The acceptance or rejection of a revised manuscript was final.

A. Putro Suryotomo and H. Cahya Rustamaji (eds.), Proceedings of the 2023 1st International Conference on Advanced Informatics and Intelligent Information Systems (ICAI3S 2023),

Advances in Intelligent Systems Research 181,

Step 7: Both authors of accepted with minor corrections and accepted with major corrections were required to address the reviewers' comments in the camera-ready version.

2. QUALITY CRITERIA

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions:

- 1. Pertinence of the article's content to the scope and themes of ICAI3S 2023.
- 2. Clear demonstration of originality, novelty, and timeliness of the research.
- 3. Soundness of the methods, analyses, and results.
- 4. Adherence to ethical standards and codes of conduct relevant to the research field.
- 5. Clarity, cohesion, and accuracy in language and other modes of expression, including figures and tables.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher.

3. KEY METRICS

Total submissions	35
Number of articles sent for peer review	35
Number of accepted articles	24
Acceptance rate	68.57%
Number of reviewers	25 (one reviewer can review up to 3 papers)

4. COMPETING INTERESTS

Neither the Editor-in-Chief nor any member of the Scientific Committee declares any competing interest.

The conference was partially funded by Universitas Pembangunan Nasional "Veteran" Yogyakarta., that has also supported or participated in some of the research submitted to the conference. **Open Access** This chapter is licensed under the terms of the Creative Commons Attribution-NonCommercial 4.0 International License (http://creativecommons.org/licenses/by-nc/4.0/), which permits any noncommercial use, sharing, adaptation, distribution and reproduction in any medium or format, as long as you give appropriate credit to the original author(s) and the source, provide a link to the Creative Commons license and indicate if changes were made.
