*Editor-in-Chief of the WCTP2023. Email: s-hagiha@photon.chitose.ac.jp

All of the articles in this proceedings volume have been presented at the *Workshop on Computation: Theory and Practice (WCTP2023)* during *December 4th -6th* in *Chitose Arcadia Plaza, Chitose-city, Hokkaido, Japan*. These articles have been peer reviewed by the members of the *Program Committee* and approved by the Editor-in-Chief, who affirms that this document is a truthful description of the conference's review process.

1. REVIEW PROCEDURE

The reviews were *double-blind*. Each submission was examined by *at least 2* reviewers independently.

The conference submission management system was EasyChair.

The submissions were first screened for suitability for the scope of the conference. After the initial screening, they were sent for peer review by matching each paper's topic with the reviewers' expertise. A paper could only be considered for acceptance if it had received favourable recommendations from at least the two reviewers.

Authors of a conditionally acceptable submission were given the opportunity to revise and resubmit after addressing the reviewers' comments. The acceptance or rejection of a revised manuscript was final.

2. QUALITY CRITERIA

Reviewers were instructed to assess the quality of submissions solely based on the academic merit of their content along the following dimensions

1. Pertinence of the article's content to the scope and themes of the conference;
2. Clear description of the problem being addressed;
3. Clear demonstration of originality, novelty, and timeliness of the research;
4. Soundness of the methods, analyses, and results;
5. Clear assertion of the benefits of the results;
6. Adherence to the ethical standards and codes of conduct relevant to the research field;
7. Clarity, cohesion, and accuracy in language and other modes of expression, including figures and tables.

In addition, all of the articles have been checked for textual overlap in an effort to detect possible signs of plagiarism by the publisher.

3. KEY METRICS

<i>Total submissions</i>	47
<i>Number of articles sent for peer review</i>	45
<i>Number of accepted articles</i>	25
<i>Acceptance rate</i>	53%
<i>Number of reviewers</i>	36

4. COMPETING INTERESTS

Competing interests was taken into consideration as follows:

- *Reviewers were not assigned to researchers who had collaborated with the author in the past or to researchers from the same university.*
- *All of the Acceptance/rejection were decided fairly in terms of peer review scores. Two borderline papers were judged carefully only by researchers from other universities with whom we have not collaborated in the past.*
- *No papers were submitted from institutions that received financial support.*
