3. The review process will consider plagiarism, novelty, objectivity, methods, scientific impact, conclusions and references
4. Reviewers will suggest improvements and or accept/reject articles
5. For articles that get notes from reviewers, they will be sent to the author to be revised and resubmitted
6. Articles that have been updated will be proofread to check readability in order to minimize errors in the use of punctuation, spelling, consistency in the use of names or terms, to word fragmentation.
