Abstract

In recent years, tourism has been more and more popular, educational tourism has become a new tourist highlights in the booming tourism industry and it began to cause for concern. In addition to the function of physical and mental entertainment, open field of vision, tourism also can cultivate sentiments, exercise will and so on. Therefore, tourism activities and quality education are closely related. For the majority of young people, tourism is not optional, but it is an important content and effective way of quality education. This paper studies the role of educational tourism in quality education, the integration of educational tourism into the development of quality education, and puts forward the improvement strategy according to the current development situation.

Keywords: educational tourism; quality education; teens

1 Introduction

At present, Chinese education is a major theme of quality education, and its fundamental is the concept of education and training model updates, quality-oriented education examination-oriented change. On the other hand, as people attach importance to education and improve education, tourism education has become a product of the times has been rapid development. Therefore, it is of great significance to study how to integrate educational tourism into the quality education of adolescents. Therefore, it is of great significance to study how to integrate educational tourism into the quality education of adolescents.

2 The theory outlined

2.1 The connotation of educational tourism

Tourism and education has a profound relationship between the educational tourism is a way of tourism, is engaged in education and tourism activities, it is in today's sustainable tourism development under the guidance of ideas, and eco-tourism, tourism, green tourism And other areas together constitute today's rich and colourful forms of tourism among the most mission of a special form of tourism.

2.2 The meaning of quality education

As Chinese education sector on the connotation of quality education for young people in different angles, to the definition of quality education is not the same. At present, the most authoritative definition for the June 1999 CPC Central Committee and State Council promulgated the "deepening educational reform on the overall quality of education decision" summary: "the implementation of quality education, is to fully implement the party's education policy, to improve the quality of the people as the fundamental purpose, to cultivate students' innovative spirit and practical ability as the focus, to create "ideals, morality, culture, discipline, moral, intellectual and aesthetic development of socialist construction and successor.

2.3 The Relationship between quality education and education tourism

The traditional education attaches importance to the book knowledge. For many years, students of the world are only home (dormitory) - school - cafeteria "This small circle, in addition to eating and sleeping, the time is almost always holding a textbook dead reading. If you want to have good score, although it is important, but must be combined with practice to play its effectiveness .Ancient emphasis on the calf book, the line of the road, the effect is the same .Tourism is one of the ways of practice, with its unique charm for the quality of education provides a classroom. The children do not have the fetters of homework, less all kinds of pressure, naturally got a spiritual baptism, spiritual sublimation, then learn what books and teachers can not teach.

3 The status quo of educational tourism into the development of young people quality education

With the development of tourism and the improvement of national living standard, the society and parents pay more and more attention to student education. In Chinese educational travel time is concentrated in Chinese large, medium and primary schools have a long holiday, summer vacation for 3 months, you can carry out long-term education tourism market. A survey of tourist travel

arrangements in the statistical analysis shows that: nearly 65% of the tourists will travel arrangements in the "winter vacation" and "holidays." Therefore, student tourists generally use the more concentrated holidays and other leisure time travel. In our country to strengthen the quality of education for young people to expand the quality of tourism, all forms of summer (winter) camp, science tour, college tourism is the rapid development of education, tourism projects of concern.

3.1 The examination-oriented one-sided education

Although the state's efforts to reform the education system and strive to develop quality education, but the college entrance examination, the examination is still continuing to determine the fate of students, schools and parents in the "backward will be beaten" under the domination of the old thinking, only the book's knowledge, Children honestly at the desk, do not want them to time "waste" in "nothing to do with learning" things.

3.2 The relevant system is not perfect, the tourism enterprises pay much attention on benefit

Young people are in the developmental stage of mental and physical development, not fully equipped with self-care ability, security awareness is weak, lively and curious, and therefore there are many youth tourism security risks. And some small-scale travel agencies, anti-risk ability, poor quality of service. Some of the travel agencies arranged tourist attractions and adult tourism groups are the same, leading young students into the shopping shop chaos, to conventional tourism education on behalf of the forest tourism. In the process of tourism, schools and tourism companies to cooperate, both organizations, cited and with the ability to test education safety factor is an important indicator of tourism.

3.3 Education tourism consumption is high

Some travel agencies introduced the high price of education, travel routes, from the actual level of consumption of students, but also to discourage parents of the students. For most families can not afford this huge sum of money. On the other hand, quality education is to teach no class, should not allow students to have a psychological gap between each other.

4 The countermeasures for the status quo of educational tourism into the development of young people quality education

4.1 emancipate the mind, update their ideas and actively promote youth tourism

Practice has proved that the appropriate tourism activities are conducive to the improvement of the quality of the majority of young people and the ability to cultivate is an effective form of quality education, should be vigorously promoted. At present, the biggest obstacle to restrict the youth tourism is the concept of the problem. Therefore, we appeal to the community: to create a relaxed environment for students to travel.

4.2 Struggle for government support, strengthen macro-control

The purpose of quality education is to cultivate talents with comprehensive and comprehensive qualities. Education tourism has an irreplaceable role in this aspect. Therefore, the government should encourage the integration of education tourism into quality education and give necessary support. Although the Ministry of Education has stipulated that all the museums and patriotic education bases must be free for young students to open education and education for the integration of tourism has played a positive and effective role, but in order to full, reasonable and effective integration still requires the government Provide more support. This article suggests the following:

1. For students to travel to give preferential travel costs, students should not be limited to half-price tickets between the school and home location.
2. Tickets in scenic spots to give concessions. At present with the student card can be free to enter the scenic spots are limited to individual attractions.
3. Individual travel agencies should be encouraged to jointly offer youth education and tourism activities in schools, and give them favourable conditions for taxation and other policies. Or specialized training by the state to train a number of specialized education travel youth travel agencies.
4. Tourism supervision departments to strengthen supervision and management to ensure that young people during the implementation of the safety of tourism, be foolproof.

4.3 Develop short-term travel and parents carrying children travel

Educational travel agencies can develop a number of affordable tourism projects. Such as "local tour", can use local educational resources, such as science and technology museums, museums, botanical gardens, etc., to organize students to visit. Some parents suggested that education and tourism must be distinguished from ordinary tourism, edutainment in the tour, such as the organization of some of the main n distinctive "theme tour".

5 The role and significance of education tourism into the youth quality education

Practice has proved that appropriate tourism activities are conducive to the improvement of the quality of the majority of young people and the ability to cultivate, is an effective form of quality education, educational tourism will integrate young people's quality education has a very important significance, its specific role and significance of the main Has the following aspects:

5.1 Extend the knowledge learned in the classroom and stimulate learning interest

There are plans to carry out youth education and tourism activities, not only to meet the leisure needs of young people can have time, but also to consolidate and extend classroom knowledge to improve the individual young people to study and study the fear, improve learning interest and efficiency. CYTS carefully designed to launch the "synchronous experience with the textbooks, textbooks to the place to go," the tourist routes, that is, primary and secondary school students in the text of the contents of textbooks designed. Young people in the study of Chinese text at the same time more desirable to see the great motherland rivers and mountains, designed according to the text of the tourism activities of the young people are immersed in the experience of the text to the mood and meaning, in a lively form of great the degree of aroused the enthusiasm of the students.

5.2 Enrich after-school life

Quality education to advocate for the students' burden reduction, reducing the burden means that students increase their spare time, free time increased. By a research report on juvenile delinquency that idle juvenile anomie leisure activities are the main features of juvenile delinquency. Because some parents and schools only pay attention to academic performance, neglect of students' entertainment and leisure, not in the winter and summer vacations and holidays to students to make healthy and correct life guidance and supervision, making young people go astray, causing trouble and others to cause adverse effects.

5.3 Grow knowledge, broaden their horizons and it is conducive to all-round development

Tourism can increase knowledge, broaden horizons and raise awareness of the world and the role of this is not a book of knowledge can be replaced. Education, learning, and many other functions and a, but relaxed and happy, it is a "entertaining" in the United States, the United States and the United States, of the ideal form of education. Educational tourism is a unique way of tourism, is designed for young people to open the type of tourism, more easily accepted by young people, making it a full realization of young people's physical and mental development of the main ways.

5.4 Improve the youth's communication skills

In the process of tourism, people do not leave the habitual station for the purpose of work, and they can not avoid people's ideological communication, emotional communication, friendship establishment and intimate contact with nature. Young people through the travel of the various communications, better self-awareness, learn from each other, cultivate good behaviour and communication habits, positive and optimistic attitude towards life and improve the quality of education level once again.

5.5 Establish the ideal, firm conviction and achieve ambition

In recent years, the rapid development of red tourism, the appropriate organization of young people to participate in red tourism, to cultivate their patriotism played an important role. In the understanding of history at the same time, but also experience the hardships of the Red Army revolution, cultivate the spirit of hard work. Many travel agencies to play the brand of education and tourism, but also have launched a "school tour", "University Tour" and other tourism projects, organize tourists to visit the campus, to understand the major schools and experience college life, to participate in various academic activities.

6. Conclusion

With the improvement of people's living standards and the increase of holiday leisure time, the era of a nation-wide tourism is coming. Promote youth tourism and start the student tourism market is not only the objective requirement of quality education, but also a favourable measure to promote the development of the national economy. In short, with the deepening of quality education, people change the concept of education, educational tourism will be integrated into the quality education.
