Abstract: Objective: to discuss and analyze the application and development of Hui nationality medicine in Sino Arab Economic and trade. Methods: to attend the 2016 Sino Arab Economic and Trade Forum cum CITIF will Arabia area some scholars, businessmen, politicians and some in the China area settled and engaged in the business work of fellow Muslims but also as the research object, a total of 200 people. This study investigated the awareness of Hui medicine in Arabic countries and regions by means of self-made Arabic Edition questionnaire survey. Results: a total of 200 questionnaires were issued and 200 were recovered. The effective rate of recovery was 100% (200/200). Hui medicine awareness rate was 45%, of which 90% of the staff is the content through participation in economic and Trade Forum China Argentina learned acupuncture; the most famous, accounted for 92%, massage the most acceptable, accounting for 89%; 64% people advocating the treatment of neck and leg disease, 58% of people think that physical fitness. 79% people can accept the use of Hui medicine ointment prescription in the treatment of diseases, 34% of people think that it is necessary to set up the Hui clinic in the countries and regions in the hospital, only 10% people know the Hui medicine speciality in Ningxia Medical University, but 45% of people are willing to understand. Conclusion: Hui medicine in Arabia national and regional awareness rate is low, but many people with acupuncture, massage and other Hui medical technology are full of interest, should increase the Hui medicine promotion efforts to promote Sino Arab friendship.

Hui medicine is an important part of medical treasure house of our country, is a unique medical civilization in China Hui people in thousands of years of history of the nation's outstanding medical knowledge and Islamic medicine are combined to create a. Hui medicine basic guiding ideology is "four", "17 true" Islamic medicine pathological basis of [1], the "Qi tonality" as the main rule is, in practice the process of combining relevant knowledge of traditional Chinese medicine, its application and development with a strong national colors and religious color, is a clinical study of diagnosis and treatment for [2] disease. As China's "Silk Road" of the development of our country and the Arabia area of economic and trade exchanges more closely, many countries of Arabia Muslim compatriots of Hui nationality in China Medical and pharmaceutical knowledge interest. In this regard, we have adopted the form of self-made questionnaires to identify and study the spread and application of Hui medicine in Sino Arab Economic and trade.

Data and methods

Table 1 current situation of Hui nationality medicine in Sino Arab Economic and trade

Result

In this survey, a total of 200 Arabic questionnaires were issued and 200 were recovered, with an applicable recovery rate of 100% (200/200). Through statistical analysis of specialized personnel, 200 subjects participated in this survey, 90 people have heard of Hui medicine, accounting for 45%, of which 90% of the staff is the content through participation in economic and Trade Forum China Argentina learned; 72% people are interested in Hui medicine, 39% of the people to understand Ningxia mulberry, 31% of the people know about "eight bottles of soup.". In the Hui medicine therapy, acupuncture is the most famous, accounting for 92%, followed by massage and cupping therapy; while in the Hui acceptable, ranked first is accounted for 89%, followed by massage, acupuncture and cupping; in the treatment of disease, 64% people advocate for neck and back

disease treatment, 58% people think that physical fitness. 33% of people choose to use medicines to treat diseases of Hui daily, willing to come to Ningxia for treatment of 30 people, accounting for 15%; 52% people are willing to accept the medical treatment of Hui nationality in the residence, would like to recommend to your family and friends for 45%, think Hui medicine can be spread in countries and regions accounted for 59% of Arabia.

79% people can accept the use of Hui medicine ointment prescription in the treatment of disease, 41% people can accept the Hui Chinese medicine decoction and pill treatment, 75% people fluent in Arabic Chinese Hui physician to the countries and regions in the medical treatment. 34% of the people think it is necessary to open the Hui nationality clinic in the hospitals of this country and region, and 52% of them think it necessary to open this subject in the universities of this country or region. Only 10% knew Ningxia Hui Medical University, but 45% of them would like to know; 37% would recommend to family and friends to study medicinal knowledge of Hui nationality in Ningxia. Precise data are shown in table 1.

Discussion

Chinese Hui medicine as an important part of Chinese medicine, is an excellent product Chinese medicine and Western medicine integration, both of the national medical technology characteristic, but also influenced by other national medicine, the medicine in the history of the development Chinese made a significant contribution to [3]. As the largest gathering place of Hui nationality in China, Ningxia is the birthplace of the emergence and development of Hui medicine, and has great practical value. [4]. With the development of reform and opening up and China "Silk Road", "The Belt and Road" development, between countries and regions China and Arabia economic and trade are closely linked, many countries and regions of Arabia in the process of contact with the Muslim compatriots in Ningxia have a strong interest in Ningxia medicine.

In this study, through the investigation and analysis of Arabia area to participate in the 2016 Sino Arab Economic and Trade Forum cum CITIF will be part of the scholars, businessmen, politicians and some in the Chinese area settled and engaged in the business work of Muslim compatriots, found that the rate was only 45% and 90% of them have known Hui medicine, the staff is the content through in the economic and Trade Forum learned, with the existing literature data compared to [5], the survey results showed that Hui medicine in Arabia national awareness has been enhanced, but the effect is still not ideal, so our Hui medicine promotion efforts have to be strengthened. In Hui medicine technology, acupuncture is most famous, accounted for 92%, massage the most acceptable, accounting for 89%; 64% people advocating the treatment of neck and leg disease, 58% of people consider that physical fitness. This is mainly because the countries and regions in Arabia are widely spread and application of a Hijamah [6] with bloodletting therapy. The Hui medicine technology in acupuncture is very similar to that in the Arabia area and is generally recognized and accepted by people. Only 39% of the people of Ningxia mulberry, 31% of the people know about "eight bottles of soup." this may be because Arabia countries and regions rarely use traditional Chinese medicine decoction, and many countries of Chinese herbal medicine registration and management have very strict laws and regulations, hindered the development of the Chinese medicine formulations. At the same time, it reminds us that with the current Sino Arab Economic and trade forum, we should also make great efforts to publicize the knowledge and technology of Hui nationality medicine so as to achieve the effect of popularizing it.

In summary, Hui medicine in Arabia national and regional awareness rate is low, but many people with acupuncture, massage and other Hui medical technology is full of interest, should increase the Hui medicine promotion efforts to promote Sino Arab friendship.
