**Abstract.** With the rapid development of science and technology and information technology in our country, it plays an important role of the creation and application of online course teaching platform in teaching. It has not only promoted the development of education and progress, but also makes the teaching quality rapidly. Network teaching platform is also called the online classroom. It is the network teaching and information exchange platform, control of College Students' learning courses and activities and other functions. It is convenient for students to use all available time independent learning, innovation efforts, and constantly improve and perfect themselves.

## Introduction

With the rapid development of information technology, put forward higher request to the people's level of knowledge, people's self-cultivation and cultural level is also rising. More and more people began to pay attention to the problem of children's education, especially higher education. The ideological and political education is one of the important content of university education. Therefore, in the context of the new media. According to the actual situation, take effective strategies of Ideological and political work of college students is a topic worthy of discussion. If you want to create a teaching platform and application of network curriculum, it should be closely combined with the "classroom teaching and practice teaching of Ideological and political course, organization set up scientific and reasonable, comprehensive and high quality teachers and has sufficient teaching resources repository, strengthen the teaching platform of network curriculum research and teaching activities in order to improve, and increase the network teaching platform of database storage. The American scholar once said: "who mastered the information, control of the network, who has the world." although some exaggeration, but the widespread use of science and technology and the rapid development of information technology and network technology, make people's life, work and ways of thinking have undergone changes in turn the world upside down. Of course, network the technology also affects the education idea, teaching content, teaching methods and ways of thinking. Network teaching platform perfect to fill the shortcomings of classroom teaching and practice teaching, known as the "Ideological and political course teaching reform focus.

## It's Important to Establish and Apply Ideological and Political Course Network Teaching Platform

From the aspect of technology, to create the "ideological and political education" network teaching platform is based on the network communication technology, digital technology, computer technology and other modern multimedia teaching carrier network technology platform, is the application of modern information technology and the information technology and the ideological and political course teaching content, teaching process and organic combination teaching methods, to create a learning atmosphere of communication, in such a network environment to cultivate and improve college students' self-learning ability, bold practice, bold exploration and innovation spirit.

**Establishment and Application of Ideological and Political Course Network Teaching Platform is the Development of Modern Education Development.** With the progress of modern society, College Ideological and political course teaching ideas, contents, means and methods in development. So the school can adapt to the college students gradually improve the ideological and moral level and comprehensive quality to meet the requirements, cultivate more high-quality talents to adapt to the rapid development of our society needs. Ideological and political course teachers should be the new idea to implement the modern educational development. In the development of educational goals, show teaching content and innovative teaching methods are to show the latest modern education consciousness, the new changes to teaching activities, and therefore can not leave the network course teaching platform for ideological and political course. Network teaching platform using the latest educational technology and teaching methods, to avoid the traditional teaching in the teaching time, teaching content, teaching schedule, teaching location restrictions, teachers and students can only overcome the shackles of face-to-face teaching in the classroom, is the premise of Ideological and political course teaching methods innovation crucial. Not network course teaching the platform is time and space bound. In order to meet the needs of students in accordance with their own need for knowledge, selected in line with their actual situation of learning time, place and method, give sufficient network Teaching resources, teaching content is based on the video image, clear language and wonderful animation show in front of college students, initiative can arouse students interest in learning and learning. In addition, due to the rapid development of information technology, information transmission speed, ideological and political course teacher education students at the same time, can absorb more knowledge in the network education platform, and actively interact with colleagues and students, expanding the theoretical depth and breadth of knowledge, a clear understanding of the thought change and development trend of College Students' new, is conducive to the ideological and political education work too.

**The Establishment and Application of "Ideological and Political course" Network Course Teaching Platform must be Linked with Theory and Practice.**"Ideological and political education" the most remarkable characteristic is the theory with practice. In order to make students understand and master the theoretical knowledge of the essence, we must practice, "the reality of Ideological and political course curriculum and the students themselves. The actual social reality is the reality of students living in society, is after years of vicissitudes the development and some problems which exist in today's society and get some of the fruits of development. With the development of the theory of complex social reality, but also in the social reality to extract the correct theory. How to make students according to the actual situation of social discrimination theory is correct or not? Open teachers should make full use of the teaching platform the network course has the interaction, the focus of social problems as the key topics or discussion, to carry out extensive and in-depth discussion, to get the correct conclusion to solve ideological problems in the realistic society. During the teachers should guide the students to correctly, use the theory and method of the right to carry out discussion. "Ideological and political education" curriculum practical fundamental teaching objective is to enable students to understand and correctly grasp the theoretical knowledge and methods, allow yourself to form a correct world outlook, the outlook on life and the value idea, to enable students to truly integrate ideological and political course learning, comprehension and mastery of theoretical knowledge, to become their own ideological standards, and correctly applied in social practice. In this process, the most difficult is how to let the students have a strong interest in teaching content into politics and thought in one's work. Network teaching platform in teaching content rich, intuitive and interactive ways to make new, more convenient and quick, can arouse students learning interest Fun, encourage students to actively participate in the network teaching, become the subject of study. The actual situation of college students is the life of the college students in their own actual and future development needs. In real life, is not the normal university students lack of network ideological and political course teachers to take advantage of the network, fill the shortcomings of classroom teaching and practice teaching, improve teaching methods and means, in order to adapt and meet students' growing desire. In addition, the teacher can also through the network teaching platform, real-time understanding of social hot issues college

students are most concerned about, but also in the ideological and political course teaching practice, linking theory actually, analyze and solve these problems, to help and guide students to find solutions to these problems, in order to achieve the ideological and political course teaching goal.

### **Establishing the Content of the Network Course Teaching Platform of Ideological and Political Course**

Ideological and political course network teaching platform includes campus network service module, module and interactive module. The campus network service module refers to the school network teaching platform. In recent years, the network has covered the whole campus, and the establishment of the campus intranet network platform, multi-management, office. Information query, data resources online Library in one, for the network course teaching in Colleges and universities "Ideological and political education" to create favorable conditions. The curriculum module contains the whole process of teaching, the teaching content, network teaching platform, teaching process and teaching method in a collection, which contains the preview before class, after class review, answer questions, online homework, a necessary link online test, the use of functional network course teaching platform for college students to bring a large number of data, three-dimensional study of Ideological and political course, and To test the learning outcomes, by answering promptly. Interactive module contains a variety of network interactive platform, easy to expand the interaction between teachers and students, such as teaching BBS, We Chat group, QQ group. BBS can be used as a "network teaching forum for ideological and political course teaching, generally contains the announcement, exchange and the discussion area. BBS is the basic function of teaching discussion and exchange, which can be carried out to discuss academic issues or social issues, but also can answer questions. Students registered in the forum, according to the district to post, replies and interactive topic or issue, experience with teachers and students to share their own learning, the discussion around the topic or issue to express their ideas and suggestions to realize the effective interaction between teaching and learning. The We Chat group and QQ group is the use of network instant communication software, set up in class Or as a member of the We Chat group and QQ group, teachers can be one to one or one to many communication counseling, students can freely interact, share learning experience or doubts, especially to meet the needs of the ideological and political education, to better reflect the mutual equality between teachers and students. In addition, video and We Chat group and QQ chat, voice and other functions, is to communicate in the class or the students in the Department, the network platform, with convenient conditions and traditional education incomparable, can effectively promote the students into the learning enthusiasm, teachers and students get extensive attention.

### **Application of Network Course Teaching Platform of Ideological and Political Course**

Ideological and political course teachers according to the specific requirements of curriculum and students' actual learning needs, making multimedia courseware accordingly, teaching video uploaded to the network teaching platform. It can meet the students before class, classroom teaching, after-school review, deepen the consolidation of knowledge, answer questions, online homework, online test and many other aspects. The use of network teaching platform, according to the physiological and psychological characteristics of students and curriculum requirements, the creation of Ideological and political course network teaching situation. This teaching platform is rich in content, form vivid and intuitive, give students autonomous learning, interaction, cooperation and inquiry of the exhibition space, to break the traditional teaching the way.

**Used in the Classroom.** "The ideological and political course" teachers in the classroom teaching, the important content of the class teaching, to identify the main problems for college students to study and explore, guide students to watch or listen to the relevant information in the network teaching platform, research and Discussion on College Students' requirements of the problem in the forum online discussions, and teachers general arrangement, then evaluate the requirement of college students in the class (or after class) within the prescribed time limit online

homework or tests, and finally get the feedback of performance. This way of teaching the ideological and political course network teaching in classroom, it is very different from the distance education, network teaching and more different fill the traditional classroom teaching, to achieve the complementary of traditional classroom teaching and network teaching.

**Teachers Guide Students to Learn by Asking Questions.** Ideological and political course teacher according to the teaching contents and teaching needs, put forward some relevant content and teaching problems. Students in the teachers' help and guidance, to find a solution to these problems clues in the network teaching platform, to learn how to get access to the web information resources, information and how to reasonable the use of these information resources and learning methods, to cultivate and improve students' self-learning ability and innovation ability.

**Applied to Autonomous Learning.** Network teaching platform to create learning atmosphere and convenience, let students use the existing learning tools and information resources to achieve their learning objectives. Specifically, students can according to their needs and individual differences, the rational use of their own time, the use of appropriate learning, choose to adapt to teaching to choose the other, they are interested in the topic or the hot issues, autonomous learning. Learning can also be repeated a teaching content or knowledge, to deepen understanding and absorb the knowledge content, after the online homework or online quizzes to test their learning gains.

**The Application of Cooperative Learning among College Students.** College students cooperative learning is the interaction process is discussed. In the process of cooperative learning, college students in the network interactive platform, and teachers, and students on issues related to communication, discussion, debate, pondering their ideas and concepts and give feedback, the conclusion is the discussion of collective harvest, and participate in the discussion of the people can understand and master the teaching contents. So there is no space, time bound and regional cooperation and discussion, to broaden students' horizons, cultivate and improve their divergent thinking and innovation ability, and such cooperation to enable students to gain far beyond the traditional classroom the teachers help and guidance, can give a lot more.

### **The Application of the Network Course Teaching Platform of Ideological and Political Course**

**Some of the "Ideological and Political Course" Teachers do not have Proper Knowledge of Computers.** In traditional classroom teaching, teachers and students face-to-face, teachers can grasp the students' learning and teaching progress. But in the network teaching platform, how to arouse the teacher's enthusiasm, how to design a high level of people willing to look at the teaching courseware, which requires teachers to have a certain level of knowledge of computers.

**Some of the Students do not have the Corresponding Conditions of Learning or Learning Ability.** The traditional teaching mode makes some students develop passive learning habits, self-learning ability and self management ability is poor, can not effectively use the network course learning. In addition, there are very few students due to family conditions, there is no corresponding equipment of network course learning.

**Cannot Guarantee the Safety of Equipment and Efficient Network Platform.** Many college students may also log on to the network teaching platform, browse the web or learning courseware, which requires high efficiency equipment, in order to ensure each college students can get their needed information resources. At the same time to ensure the safety of each student can the independent use of network teaching platform. If not timely update equipment and improve network security verification procedures, not the normal use of the network teaching platform.

### **Summary**

In recent years, the rapid development of science and technology and information technology, the application of network course teaching platform of people more and more to carry out learning. Network course has become an important means to continuously improve and perfect themselves. Also, many colleges and universities because of the creation and application of Ideological and

political course learning platform of network course teaching, achieve better teaching effect, to speed up the ideological and political course in university teaching reform.
