Abstract—“Jiejieliang” events has caused extensive social negative influence, and “two-faced” phenomenon in college students in the communist caused widespread attention, which means enjoying high quality training resources of Communist Party of China, while secretly making public speech humiliating to China. It's incompatible with the most basic requirements of party members who “have the party in their hearts, consistent words and deeds”. How to cultivate ideological and political quality of college student party members becomes an urgent problem to be solved in the recruitment of the Party member. As a college student party member, we should strengthen our ideals and beliefs, improve the development and assessment mechanism of student party members, supervise the party, and strictly govern the party.

Keywords—College students in the communist; Two-faced People; Recruiting the Party member

I. INTRODUCTION

A. Review of “Jiejieliang” Events

“Jiejieliang”, a registered name on Sina Weibo, (real name: Jialiang TIAN), a postgraduate from one of 985 and 211 key universities (hereafter referred to as “Jiejieliang”), publicly released derogatory remarks about Chinese people on Weibo on April 20, 2018 such as “rotten you Shina”, called a part of netizens as “pink dolphins”, and said that her undergraduate school (a normal university in the northeast in Northeast China) was a “diploma mill”. After cyber manhunt from her network name, it found that this student was actually a secretary of the postgraduate party branch, a national scholarship winner and an outstanding municipal party member, she would become a doctor from direct recommendation because of her excellent performance at school, but her paper published during the undergraduate course was suspected of plagiarism. There was a lot of public outcry during such period, the netizens believed that “such student eating and living in China but cursing China is a kind of degenerate in China?” Some netizens believed that “the student is no longer qualified to be a socialist successor”, some netizens even believed that “it is not only a simple demand for a serious record of party members, it can be seen that the party building is very chaotic in this university because this kind of two-faced speculator who has no party spirit can

enter the party organization of your school and serve a mayor post! She should be expelled from the party, and it can also be seen from particular facts or examples that the party organization of your school is seriously corrupted, and there is a great problem in candidate selection, the relevant personnel in this party organization must also be punished, and it is suggested that the relevant departments should strictly investigate it”, and the event was upgraded to the corruption of the organization. After being forwarded and exposed by the three mainstream media, i.e. “Tower of Violet Light”, “Central Committee of the Communist Youth League” and “People’s Network” on Weibo, the key 985 and 211 university (where the student studied) believed that “Jiejieliang” made some “wrong speeches” and she was placed on probation within the party and kept in school but placed under surveillance. On August 15 of that year, the party committee of the college expelled Jialiang TIAN from the CPC according to the party discipline. At the same time, the college proposed to suspend the doctor training of Jialiang TIAN and gave her a drop-out advice. In September, Jialiang TIAN has already gone through the formalities of leaving school.

In the Sina Weibo system, if searching for the hot comments with “Jiejieliang” as the key word, the number was above one thousand in total, the only at 14:00 on April 25, 2018, the pageviews were 20 million +, and those of the three mainstream medias including “CCTV News”, “Communist Youth League Central Committee” and “People’s Daily” reached 10 million+, the forwarding frequencies reached 10,000+, the likes reached 20,000+, the replied comments reached 20,000+, and the influence was wide.

B. What is Two-faced People

There is a poem: people before a pair of respectable, people still free and loose; The tongue is strong and the tongue is strong.

Jinping XI pointed out in the 19th Party report that the new era is firmly committed to strict party discipline in all aspects and political construction must be given top priority. The whole party should “carry forward the values of loyalty, honesty, fairness, honesty, truthfulness and honesty” and “firmly oppose double-dealing and double-dealing”. Phenomenon of “the dichotomy” originally found only exists in

[Profile of the Author]Chen Ping (1983-), female, born in Fuzhou, Fujian, doctor of Economic, Fujian Agriculture and Forestry University. Research direction for tea economic management, ideological and political education in university and so on.

the party member cadre very rare, but from the "jie jie what event" as you can see, in the party's cadre group also appeared in the future so a handful of people, the world outlook, the outlook on life, values the idea "master switch out of the question," spiritual "calcium", the loss of political concentration, big speak in front of communist ideal and faith, but yearn for western social system of values and way of life; The conference will talk about the belief "boiling blood", but secretly criticized and mocked marxism as "fashion", as a stunt. [1].

Jinping XI said in his speech at the sixth plenary session of the ccdi that "a large number of cases show that there are some within the party who are prominent on this issue. Some cultivate one's morality not true cultivate, belief not true letter, very can disguise, like performance make a show, duplicity, deceive one under, say one set, do one set, one set on the stage, one set on the stage, one set on the face, one set on the back, the wrist is very high".

"This kind of 'two-faced person' is very harmful to the cause of the party and the people, and it is necessary to identify them and remove them in time." Since the 18th National Congress of the Communist party of China, the General Secretary Jinping XI has repeatedly warned the whole party that the party should be loyal to the party, be honest and loyal to the masses and resolutely oppose the double-dealers and "two-faced persons". It requires all party members to be honest and open to the party and to be honest, sincere and well-behaved. It is necessary to constantly strengthen the ideological and moral cultivation, and to keep the party in mind and suit action to the word, which is the most basic requirement of party members [2].

"Jiejiliang" served as the secretary of the graduate party branch during her master's degree, the students also said that her performance was good in the life, excellent in studying and serious in working, and she should be the important object for "promoting loyalty, honesty, fairness and decency and seeking for honest, upright and other values", they did not expect that her words and deeds were so different on the Internet. The netizens were filled with indignation and thought that "Jiejiliang" had no "four awareness's" and violated "six disciplines", she was a typical "two-faced person", and such two-faced words and deeds should not be ignored by "the public who is kept in the dark".

C. Stimulate the development of Party members

This event reflects the problems of the grassroots organizations of the university campus party intensively, including but not limited to party member training, ideological education, party member management, etc., which is something that needs to be reflected.

In May 1942, An Address Yan'an Forum of Art and Literature made by Zedong MAO clearly stated the problem of joining the party without ideas: "There are many party members who have joined the party in the organization, but not fully joined the party in their ideology. In this way, those who have not even joined the party in their ideology at all still have many dirty things of the exploiting class in their minds, they do not know what the proletariat thought is, what the communism

is, and what the party is". The party members' eight obligations clearly stipulate that they must not be two-faced persons. Under such a background, how to construct a party organization that discerns loyalty and knows talents and how to cultivate a real and serious party member have become an urgent problem to be solved.

II. THE CURRENT NEW ISSUES ON THE DEVELOPMENT OF COLLEGE STUDENT PARTY MEMBERS – TAKE "JIEJILIANG EVENT" AS A CASE

The group of college student party members has a certain uniqueness, the university students are not only the pillars of the country and the party in the future development, but also will enter the grassroots party organizations in the national and social fields after they graduate.

With the progress of society and the changes of the times, all kinds of thoughts are constantly pouring into colleges and universities, and the ideological ideology of college students is not yet fully mature, and their outlook on life and world view are easily interfered by the external environment, therefore, there are some imperfections in the existing process of developing party members in colleges and universities, and the problems will be easily caused and "double-faced persons who are different between words and deeds" will be cultivated in the process of developing party members [3]. "Jiejiliang" is not only a student party member, but also the secretary of the postgraduate party branch. During her school year, she won countless awards and she was a role model in the school's positive publicity, but she has reversed face without "loving party and country" on the Internet. From this event, we can see the problems in the development of party members: The motivation and investigation are insufficient for college students to join the party; The excellent college students are often chosen preferentially into the party and the criteria are different; There is a problem with the appointment of student party members and cadres; Ideological education is very superficial, etc. [4].

A. It should be strictly inspected from the party's nature, and the mistake may be caused if the inspection is not strict

1) Academic achievements is an only decisive factor, and one ballot veto is taken.

The one-vote veto standard of academic achievements is intended to screen the performance of college students in school, however, the link to the development of party members is often "changed", the objects recommended by the grassroots party branches and trained objects determined by the grass-roots party branches tend to be good classmates in achievements, while some students with good academic achievements are often neglected to study and improve political theory because they are busy with theoretical studies, and meanwhile, some students whose motivations are not upright enough and those who are good at camouflage have opportunities to apply for joining the party due to private interests.

Generally speaking, there are three typical party member development modes in undergraduate colleges in China: The first is research-oriented mode, and the students' scientific

research ability and strength is taken as the criterion for the development of party members; The second is teaching-oriented mode, and the excellence level of students' academic achievements is taken as the criterion for the development of party members; The third is the scientific research and teaching mode, and the development criteria for student party members are based on scientific research + achievement for the development of college student party members. In such context, the colleges and universities that attach more importance to scientific research and academic achievements may easily ignore moral education, and if the moral conduct control of the talents are not strict, it may lead to the phenomenon of "two-faced person".

Judging from the "Jiejiliang event", the student is a master of the school. With the six papers published in the undergraduate course, excellent academic performance and the perfect resume of the chairman of the student union, she was successfully recommended to a 985 and 211 university as a master, but if only attaching importance to the achievements simply, it is easy to equate "the person with good learning and working abilities" to "key training target of the party's team", thereby easily leading to the recruitment of some comrades with weak political awareness and low public evaluation.

2) *The foundation survey of the masses is very superficial*

The opinions and talks during the foundation survey of the masses are very superficial, and the students around the object to be developed are not willing to be "bad guys", and most of them believe they should not "hit a person when he is down in this key link" regardless of the evaluation of the object to be developed. If the grass-roots party organization does not adhere to the principle of coming from the masses and going to the masses, conducts detailed and solicited investigations in the schools and the student dormitories, or ask for the opinions of the majority of students and teachers, the process of choosing the best students to join the party will lose the deep mass base as one ear is deaf and the quality of the student party members who are being developed cannot be guaranteed [4].

Simultaneously, it is necessary to pay attention to the dynamic changes in the thoughts from the submission of the application for joining the party to becoming a formal party member, and individual applicants who lack political positions, have faltering beliefs, lack ideals, have weak awareness of party members and become rat-fuck in words are also positive in motivation for joining the party at the beginning, but after becoming a formal party member in the actual development process, their thoughts and actions have changed, which is also worthy of vigilance.

B. *"Four self-confidences" are lacked and the motivation for joining the party is not pure*

1) *Lack of cultural self-confidence*

In the face of the reply to the netizens, "Jiejiliang" called the other party as "pink dolphins" (a network terminology, meaning blind patriots), and simultaneously called all Chinese but not a small part of people who were not high in quality as "rotten you Shina" in case of garbage stacking after an event was held, and she self-separated herself from Chinese. The root of the problem lies in the lack of cultural self-confidence. I

believe that I am superior as an European and American fan, and "Shina" is the so-called Chinese who hold the traditional Chinese traditional culture and idea, i.e. "low-level rustic", such appellation is general in many groups such as cartoon, e-sports, drug abuses and gays.

2) *The exquisite self-interestedness is raised*

Those who want to join the party are only for profits. From the perspective of the motivation for joining the party, joining the party is not to realize the dream of the Chinese nation's revival, but to pursue a better "prospect". In this event, "Jiejiliang" said that her undergraduate university (a normal university in the northeast of China) was a "diploma mill", she completely forgot her undergraduate university's training and love for her, and in her undergraduate university, she became the chairman of the student union and was recommended as the outstanding municipal Communist Party member and to participate in the "China Telecom Scholarship", and then she was recommended as a master student in one 985 and 211 key university. Unfortunately, this student was not "thankful" to her undergraduate university, but also insulted it, and this normal university in the northeast of China was "betrayed".

III. THE ENLIGHTENMENT OF "JIEJILIANG" EVENTS TO THE DEVELOPMENT OF PARTY MEMBERS IN COLLEGES AND UNIVERSITIES

Some netizens were not aware of the incident as "a small matter", including the client, "Jiejie liang", who believed that he had "freedom of speech" and had the right to make his political opinions public online. As an adult, as a party member, he did have "freedom of speech" and was also responsible for his own speech. Regulations on discipline punishment of the communist party of China, part ii, chapter 6, explicitly stipulates that "... , etc. Publicly state the position of adhering to bourgeois liberalization and opposing the four basic principles. Article, speech, declaration, statement, etc. of the opposition party's policy on reform and opening up shall be subject to expulsion from the party "; Article 46 clearly states that "through the network... Those who smear the image of the party and the country, vilify or defame the party and state leaders, or distort the party and military history. If the circumstances are serious, he shall be dismissed from his post within the party or given disciplinary sanction. If the circumstances are serious, the party shall be expelled from the party. After investigation, the key universities of 985 and 211 that the student studied believed that "Jiejiliang" and "wrong speech" should be punished with party probation and school detention first, and the punishment of expulsion from the party and school shall be finally given in the party and government meeting. The following inspirations on the development of party members can be obtained from this event:

A. *Firm one's ideals and beliefs and turn off the "master switch"*

The most dangerous shaking is the ideal belief slide. The "master switch" is not tightened, the appearance is inconsistent, words and deeds are inconsistent, on the stage and under two images, people behind the two performances are inevitable. A large number of facts have proved that the ideal and belief is the root of party members and the place of soul. Without the

root, students would be "inconsistent in words and deeds" and become party cadres in the future would be "deluded" and there would be big problems.

Instead of regarding marxism as their true belief or socialism and communism as their lifelong ideal, the "two-faced People" used party membership as a tool to seek for interests and future. Therefore, we must firmly believe in our ideals and firmly grasp the "master switch". [5].

B. The party should be in control and strict with the party

To govern a country, the party must be governed first and strictly. This student "because of the words obtain the crime", the party committee of the university gives next only to "expel party membership" "the party to inspect", this punishment enters the file, cannot eliminate, to this student future examination unit work and the civil servant cause huge influence. However, the student was suspected of plagiarizing the paper published during his undergraduate study, and the student mainly relied on his undergraduate scores (plus points for publishing the paper), which may lead to a series of consequences in the later stage -- withdrawing his undergraduate degree and disqualifying him for postgraduate study. , no matter in the first step in the development of party members to become full members, to the ideological training issue, from the central about improving work style "eight" close ties with the masses, and MAO's army "three discipline eight note", until the party were the first to fight for their superior activity, three solid steady tightening, 2 learn how to make a series of activities, such as the "loyal" to "service for the people" "seeking truth from facts" belief "into the brain in mind," real students party member to endure the test of all kinds of, really know which line faithful [6].

C. To construct a more perfect evaluation index system of college student party member development quality

The evaluation of the development quality of college party members is important to the improvement of students' comprehensive quality and the education of college students' ideology and politics. The guiding role is the inevitable requirement of the party constitution and the construction of the whole student party members' advanced nature and purity [7]. In view of the basic requirements of outstanding communist party members proposed in the activities of innovation and competition for excellence among university students, the model performs the obligations prescribed in the party constitution, and achieves the "five leaders". The quality evaluation system of student party members (including probationary party members) is constructed from the aspects of ideological arming, striving for success, mass foundation, abiding by discipline and law, and style accomplishment.

One joined the party in organization for a while and in thought for a long time. Party member development shall be controlled by quality from the source, and shall do a good job in mass opinion survey, accountability and defense, development object's heart talk, ideological report, etc., taking into consideration the daily performance, work performance

and study performance of party members in development, not "quantifying" the indicators of party member development, and shall be allowed to fluctuate within a certain range. After becoming a full party member, we will not relax the supervision and management of student party members, and strengthen party members' awareness and responsibilities.

IV. IMPROVE THE DEVELOPMENT AND ASSESSMENT MECHANISM FOR STUDENT PARTY MEMBERS AND BUILD A HIGH FIREWALL

The perfect party member development and examination mechanism can not only prevent excellent student party members from becoming "two-faced persons", but also prevent the "two-faced persons" from operating in the dark and camouflage performance. General Secretary Jinping XI pointed out that "the understanding of cadres should not stop at feelings and impressions, but should improve the investigation mechanism and methods, and have a thorough understanding of them through multiple channels, multiple levels and multiple aspects." The same is true for student party member development. College students' party member development should go through four stages, such as activist, development object, probationary party member and party member, which is a dynamic development process. Process management is very important to the promotion of quality of college students' party development, the influence of the party organization of colleges and universities should organize and coordinate all aspects of the power, the full participation of quality management project, one is to pay special attention to the development of each stage of the process management of party members, the second is to implement good party members in the process of management development quality evaluation standard, discover the problems existing in the development of party members and the insufficiency, through the meticulous, strict management and standardize the process subtly influence the formation of the party spirit party members among college students, enhance the level of quality of college students' party development [7].
