Abstract. The traditional cultural elements are integrated into the ideological and political education in colleges and universities to maximize the value of traditional culture in ideological education and to promote the effect of ideological education in colleges and universities. Under the background of the new era, the Chinese traditional culture bears the historical tradition of the essence of the Chinese nation. The introduction of traditional culture into the classroom of ideological and political education is of great significance to the continuation of Chinese civilization, the promotion of the historical heritage of the Chinese nation, and the strengthening of cultural self-confidence. Integrating the traditional culture into the ideological and political education of college students, coping with the impact of the values brought by the continuous integration of Chinese and Western cultures, using the traditional values of spiritual civilization of the Chinese nation to guide college students to reform their outlook on life and values. We will carry forward the socialist core values. From the perspective of traditional culture, this paper analyzes the path of ideological and political education classroom education, taking Chinese traditional culture as the guide, and trains comprehensive talents with all-round development.

Keywords: traditional culture; ideological and political education; cultural self-confidence; spiritual civilization.

1. Introduction

Culture is the blood of the nation, it is the spiritual home of the people, the traditional culture of the Chinese nation is the values and codes of conduct that unite the concept, wisdom, magnanimity and charm of the Chinese nation, and the excellent traditional culture of China is the spiritual lifeline of the Chinese nation. It is a prominent advantage of the Chinese nation and an important source of our cultural self-confidence [1]. The traditional culture is constantly integrating the ideological and political education of the university, and bringing the traditional culture into the construction of the innovative system of ideological and political education for college students. It is an important way to show our country's road confidence, theory confidence, system confidence and cultural confidence. With the continuous development of new media technology and Internet technology, a large number of Western cultures are impacting the ideals and beliefs of young people, using Chinese excellent traditional culture to carry on the company education and inheriting the excellent traditional culture of the Chinese nation. Build the socialist core value system and improve the innovative level of ideological and political education for college students. The ideological and political education of college students plays an important role in the development and dissemination of socialist core values as an important classroom to cultivate their ideals, beliefs and moral sentiments. China is a country with a long history of traditional culture. The excellent traditional culture of our country has played a positive and important role in the ideological and political education of college students, and the traditional culture has been integrated into the system of ideological and political education of college students [2]. To carry forward the spirit of Chinese traditional culture, to improve the ideal moral level of college students, to solve the impact of the fusion of Chinese and western cultures on the ideological and political education of college students, and to promote the understanding of ideological and political aspects of college students. It is of great significance to study the innovative path of traditional culture on the work mechanism of ideological and political education of college students, to optimize the classroom reform of ideological and political education for college students

and to improve the teaching quality of the classroom of ideological and political education for college students.

2. Relationship between Traditional Culture and Ideological and Political Education of College Students

The traditional culture is the inheritance of the excellent tradition and spirit, the deepest spiritual pursuit of the Chinese nation, the extensive and profound traditional culture of the Chinese nation, the accumulation of the excellent civilization of the Chinese nation, and the benevolence advocated by the excellent Chinese traditional culture. Paying attention to people first, abiding by good faith, upholding justice, Shang he, seeking for great harmony, and so on, as well as the spirit of unity of knowledge and action, honesty and trustworthiness, union and fraternity, have important enlightenment and guidance function to the ideological and political education of college students. Marx said: "people create their own history, but they do not create whatever they want, not in the conditions they choose, but directly meet, set, create from the conditions inherited from the past. " It is necessary to inherit the excellent Chinese traditional culture and integrate the Chinese traditional culture into the ideological and political education work mechanism of college students to innovate the educational idea and promote the further development of the ideological and political education work mechanism [3].

2.1 Vigorously Carry Forward the Excellent Chinese Traditional Culture, Enhance the Connotation of Ideological and Political Education for College Students

Under the background of the new era, the Chinese traditional culture bears the historical tradition of the essence of the Chinese nation. We need to vigorously carry forward and develop the excellent Chinese traditional culture, pass on the spirit of the excellent Chinese traditional culture, constantly strive for self-improvement, and carry forward the traditional Chinese virtues, such as being brave in doing good deeds, being filial piety and loving one's parents, and so on [4]. Integrating Chinese traditional culture into the ideological and political education system of college students, combining traditional culture with realistic culture, strengthening the protection of Chinese excellent traditional culture, and basing on the teaching demand of ideological and political education, Enrich the connotation of ideological and political education and classroom teaching content. In the construction of inheriting Chinese traditional culture, we should combine the spirit of the times with the traditional culture, train the college students to build up the value concept of virtue, carry on the reasonable inheritance to the traditional culture with the core values of contemporary socialism, and bring forth the new from the old. And bring the content of traditional culture into the ideological and political education system, take root in the national civilization, carry forward the spirit of Chinese traditional culture, inherit the excellent traditional culture and carry forward the spirit of the times, and innovate the working system and mechanism of ideological and political education [5].

2.2 Strengthen Cultural Confidence and Guide the Innovative Construction of Ideological and Political Education in Universities

The Chinese nation is an excellent nation in history. The traditional culture of the Chinese nation takes the modest culture of Confucianism as its intrinsic information and plays an important leading role in carrying forward the spirit of honesty, unity and friendship, and being willing to help others. Under the background of the new era, it is of great significance to carry forward Chinese traditional culture and introduce traditional culture into the classroom of ideological and political education, which is of great significance to the continuation of Chinese civilization, the promotion of the historical heritage of the Chinese nation, and the strengthening of cultural self-confidence. In inheriting and carrying forward the traditional Chinese culture, we should strengthen the leadership of the Communist Party of China, use the Party's advanced theory and spirit to guide the innovation and development of cultural inheritance and ideological and political education, and use the traditional Chinese culture to guide college students' world outlook in the process of ideological and

political education [6]. Outlook on life, values, aesthetic formation. Through strengthening cultural self-confidence and guiding the ideological and political education construction of college students, it is the code of conduct for college students to cultivate respect for the time, to observe the position, to know often and to change, to open things up and to build up the merits and achievements. This paper tries to draw nutrition and wisdom from the excellent traditional culture formed and accumulated by the Chinese nation from generation to generation so as to open up a new work mechanism of ideological and political education for college students and to innovate the development path of ideological and political education for college students.

2.3 Excavate the Value Connotation of Traditional Culture, Strengthen the Actual Effect of Ideological and Political Education

Under the background of the socialist era, it is necessary to carry forward the traditional values of the Chinese nation. The constant infiltration of Chinese traditional culture in the ideological and political education classroom helps college students to form a correct world outlook and outlook on life. It is necessary to develop and strengthen the Chinese traditional culture moral system and integrate the traditional culture into the classroom of ideological and political education in colleges and universities, which is the necessary demand for the innovation and development of the classroom system and the innovative path of the ideological and political education for college students [7].

3. The Necessity of Integrating Chinese Traditional Culture into the Ideological and Political Education of College Students

Traditional culture plays a positive role in fostering and shaping college students' personality. Traditional culture promotes honesty, integrity, integration of knowledge and action, and maintains the values of harmony and kindness and fraternity. To maximize the role of traditional culture in the process of shaping the personality of college students. The integration of Chinese traditional culture into the ideological and political education system of college students is an inevitable demand for the construction of the times and the establishment of virtue [8].

3.1 The Inevitable Requirement of Carrying Forward the Advanced Socialist Culture

The traditional culture of the Chinese nation is broad and profound and rich in connotation. It is the concentrated embodiment of the good moral customs of the Chinese nation and the foundation of the confidence of the Chinese culture. The traditional culture of the Chinese nation is integrated into the construction of the ideological and political education system of the college students, and the spiritual connotation of the traditional culture of the Chinese nation is inherited and discovered by cultivating the ideal moral sentiment and the social mainframe values of the college students. Ability to open up the future, good at inheritance to better innovation. The integration of Chinese traditional culture into the ideological and political education of college students is an inevitable requirement for the construction of socialist spiritual civilization and cultural heritage, and an important connotation in the construction and development of socialist modernization. It is also the basis of the development of Chinese socialist core values. Therefore, we should integrate traditional culture into the ideological and political education system of college students, optimize the path of development, inherit and develop Chinese traditional culture in the classroom of ideological and political education, and construct the socialist core value system and socialist core values. To guide college students to cultivate socialist ideas, beliefs and moral sentiments, and to improve the moral standards of college students.

3.2 Chinese Traditional Culture is the Important Foundation of Building Socialist Spiritual Civilization

Chinese traditional culture is an important foundation for building socialist spiritual civilization. Therefore, to integrate Chinese traditional culture into the ideological and political education work mechanism of college students is to inherit and carry forward Chinese traditional civilization. The

foundation of promoting socialist spiritual civilization construction. College students are the bearers of China's modernization drive in the future. In today's society, where Chinese and Western cultures are constantly merging, it is necessary to vigorously carry forward the traditional Chinese culture. The traditional values of spiritual civilization of the Chinese nation are used to guide college students to reform their outlook on life and values, to carry forward the socialist core values, to add traditional cultural education to the system of ideological and political education, and to innovate the development mode of education. To enhance the effectiveness and connotation of ideological and political education.

3.3 Integration of Traditional Culture into Ideological and Political Education of College Students is an Important Weapon to Deal with the iMPACT of Western Culture

With the development of the times, the spiritual connotation of Chinese traditional culture is becoming more and more important in promoting the transformation of life values. Under the impact of new media, the traditional Chinese culture is used to guide college students to carry out the transformation and cultivation of ideological and moral sentiment. The transformation of life values in the collision of multiculturalism and interest will help college students to form a good spirit of selfless dedication and collectivism. It has great significance to cultivate the spirit of mutual help and harmony and friendliness among college students. Chinese traditional culture is the important foundation of building socialist spiritual civilization, and the traditional culture is integrated into the ideological and political education of college students. To cope with the impact of the values brought by the continuous integration of Chinese and Western culture, to enhance the ability of students to distinguish right from wrong, and to keep a normal heart in the face of the complicated society.

4. The Way of Chinese Traditional Culture Integrating into Ideological and Political Education of College Students

Chinese traditional culture is of great significance to the development of college students' ideological and political education and the cultivation of college students' moral sentiment. The traditional culture is integrated into the ideological and political education system, and the path and mode of college students' ideological and political education are innovated. It is of great significance to shape college students' outlook on life, values, world outlook, and the concept of sexual goodness, which is dominant in Chinese traditional virtues, to cultivate the spirit of solidarity and harmony and friendliness among college students. The traditional culture has an important influence on college students' ideal and belief education and career planning education, which is helpful to cultivate college students' social morality, and to construct the innovative mode of ideological and political education for college students by using traditional culture. To develop the innovative path of ideological and political education for college students.

4.1 The Content of Chinese Traditional Culture should be Integrated into the Curriculum to Perfect the Curriculum System of Ideological and Political Education

The Chinese traditional culture is full of the contents of creating a person by virtue, and integrates the traditional culture into the curriculum system of ideological and political education for college students. The content of diversified cultural value is adopted to enrich the classroom of ideological and political education for college students. The classical works of Chinese traditional culture are used to enrich the ideological and political curriculum system of college students, and the contents of the ideological and political education courses for college students are set up by means of multimedia courseware, micro class and video. To enhance college students' cognition and understanding of traditional culture, to improve their cognition and understanding of Chinese traditional culture, classical works, historical culture, so as to cultivate their personality and moral sentiment with good cultural spirit. Enlighten the thinking cognition of college students, let them cultivate their values and outlook on life from traditional culture.

4.2 To Integrate Traditional Culture into the Moral Spirit Education System of College Students and to form a Healthy Moral Concept

The moral spirit in the traditional culture and the traditional Chinese moral outlook play an important role in the improvement of the ideological and political character of the college students. The Chinese traditional cultural virtues are integrated into the cultivation of the ideal moral sentiment and the spiritual education of the college students. Optimize the innovative work path. The Chinese always regard "the world is common to people" as the ultimate value ideal. Through the influence of the traditional culture, the college students form the ideal moral sentiment of the public for the world, and form the life values of "giving up oneself and serving the public". Fan Zhongyan said: "worry before the people's worries, and happiness after the people's happiness", which embodies the moral spirit of being brave and dedicated to the people. Under the exaggeration of these cultural values, college students should carry out ideological and political education and improve, so as to cultivate and cultivate a world of worries. Happy with the spirit of the world. The traditional culture has positive significance to the moral spirit education of college students. Through the inheritance of cultural value, the national spirit and patriotism concept of "giving up oneself and serving the public" is formed, and the actual effect of ideological and political education for college students is improved.

4.3 Guide the Ideological and Political Education with the Traditional Virtues of Chinese Culture, and Cultivate the Ability of Ideological and Political Self-Education of College Students

The traditional culture plays an imperceptible role in guiding the spiritual value and moral outlook of college students. Through traditional cultural education, traditional Chinese culture is integrated into the ideological and political education system of college students. For example, "the beginning of human being" is emphasized in the "three characters Classic". Nature is good, is Zengzi said, "my three provinces of my body". These traditional cultural spirits play an important role in guiding and infecting the establishment of the public morality of college students and the building of the students' morality. Through the construction of traditional culture, they form the moral consciousness of being cautious and independent, introspecting, respecting and nourishing qi. In the use of traditional culture to guide the students, improve the ideal moral sentiment of college students imperceptibly. The concept of sexual goodness, which is dominant in Chinese traditional virtues, is of great significance to cultivate the spirit of mutual assistance and harmony and friendliness among college students. The traditional culture has an important influence on college students' ideal and belief education and career planning education. It is helpful to cultivate college students' social morality and self-discipline consciousness with the idea of "practicing self-discipline and being cautious about their own independence". Using the concept of "integration of knowledge and practice" of "three provinces of my day and my body", we can cultivate the practical spirit and innovative spirit of college students. Through the integration and education of traditional culture, we can give full play to the positive role of ideological and political work.

5. Conclusion

The traditional culture of the Chinese nation is extensive and profound, based on the teaching needs of ideological and political education, enriches the connotation of ideological and political education and the contents of classroom teaching, and vigorously develops the traditional Chinese culture. The traditional values of spiritual civilization of the Chinese nation are used to guide college students to reform their outlook on life and values, to carry forward the core values of socialism, and to promote the innovative ability of ideological and political education of college students. Integrating the traditional culture into the ideological and political education system of college students, carrying forward the spirit of Chinese traditional culture, promoting the ideal moral level of college students, and solving the impact of the integration of Chinese and western cultures on the ideological and political education of college students. Show our road confidence, theoretical confidence, institutional confidence, cultural confidence.
